Architectural Ornaments

While architectural ornaments embellish and adorn a building's structural design, they also form an integral part of a structure's framework. Types of ornaments include decorative pieces such as dormers, finials, leaderheads, panels, moldings, roof cresting and medallions, and also structural elements such as roof and chimney flashing, ridge and dormer vents, and chimney caps.

Standard and Custom Ornaments

Working together with Kaufmann GmbH and Umicore Building Products, Ornametals offers a full-range of architectural ornaments in copper and VMZINC® including dormers, finials, leaderheads, panels, moldings, roof cresting, medallions, roof and chimney flashing, ridge and dormer vents, and chimney caps. Ornametals offers custom design and can fabricate ornaments to specification.

Dormers

Weathervanes

Molding

Medallions

Roof Cresting & Ridge Caps

Decorative Panels

Copper finials and dormers adorn Temple B'Nai Shalom in Huntsville, Alabama.
The architectural ornaments were painted white for historical accuracy.

Historic Restoration and Preservation

Ornametals fabricates, restores and preserves custom copper and zinc roofing systems, cupolas, finials, towers and other architectural elements for projects throughout the world. We utilize techniques that have been passed down for hundreds of years, along with modern methods and equipment. Contact us for more information about our restoration and preservation services.
